

Scale to Win (STW) Texting

Key Features and Resources

- Texter privacy: Texter phone numbers are never used to send messages. Text campaigns use 10DLC (10 digit-long code) [numbers you register for in advance](#). You select the area code.
- Scale to Win requires your organization to have a current 10DLC registration and enables registration directly from the STW Texting platform. [See our updated article on 10DLC](#).
- Integration with Votebuilder (VAN) data: [NGP VAN sync](#) allows your tags and opt outs to automatically update VAN after a one-time Application Programming Interface (API) set up.
- Shortened trackable URLs: [Link tracking](#) lets you see who's engaging with your messages and easily retarget contacts who clicked the link in your original message (like EMS links)
- Advanced scripting: [Build campaigns](#) to easily make your messages stand out with personalized content using [advanced conditional formatting](#).
- Training and support materials at [Scale to Win Training site](#)
- STW [Getting Started Guide](#) for new admins
- Sign up for [STW Training](#)

Set up Your Scale to Win Account

- Request an FDP Scale to Win texting subaccount by submitting an [FDP data ticket](#).
 - Provide your initial admin's full name, email address, & role in your organization; and if different, your billing contact's full name, email address, & role.
 - All STW text request forms should be submitted by a person from your organization who is in charge of financial decisions. If a DEC, this should be the county chair or an officer who is responsible for financial decisions.
 - Subaccounts cannot send texts until their designated billing contact sets up their payment method and they complete their 10DLC registration. STW has an entire 10DLC team to help with this.
 - You will receive your credentials in an email from hello@scaletowin.com
- When you receive the email invitation to join Scale to Win, click the Join Link. Everyone using your account needs to click this join link.
 - Complete your personal account info on the sign-up page and click Sign-Up
 - Click the + button on your People page to access the join link for new texters.
- Your STW Text account will have a custom URL, i.e. https://floridadems.app.scaletowin.com/
- Check the [STW Text Onboarding Checklist](#) you are ready to start a texting campaign.

Please note: The FDP is happy to provide our Democratic partners across the state with our lower billing rate by creating subaccounts. It is very important that all questions, requests, or issues moving forward are directed to the vendor's dedicated support team for the quickest resolution: support@scaletowin.freshdesk.com. You can also submit support tickets here:

<https://scaletowin.freshdesk.com/support/tickets/new> Please bookmark!

Get Your 10DLC (may take 7-10 days)

- You can access the Campaign Verify 10DLC registration form directly from your Scale to Win account (under Phone Numbers) or go to [Campaign Verify](#) to create an account and request a token for your new 10DLC that will be good through January 2027 (\$95). Use the verification token to register for your 10DLC using the STW 10DLC registration form under "Phone Numbers" in the STW Text Main Menu. Click "Register for 10DLC" to go to the form.

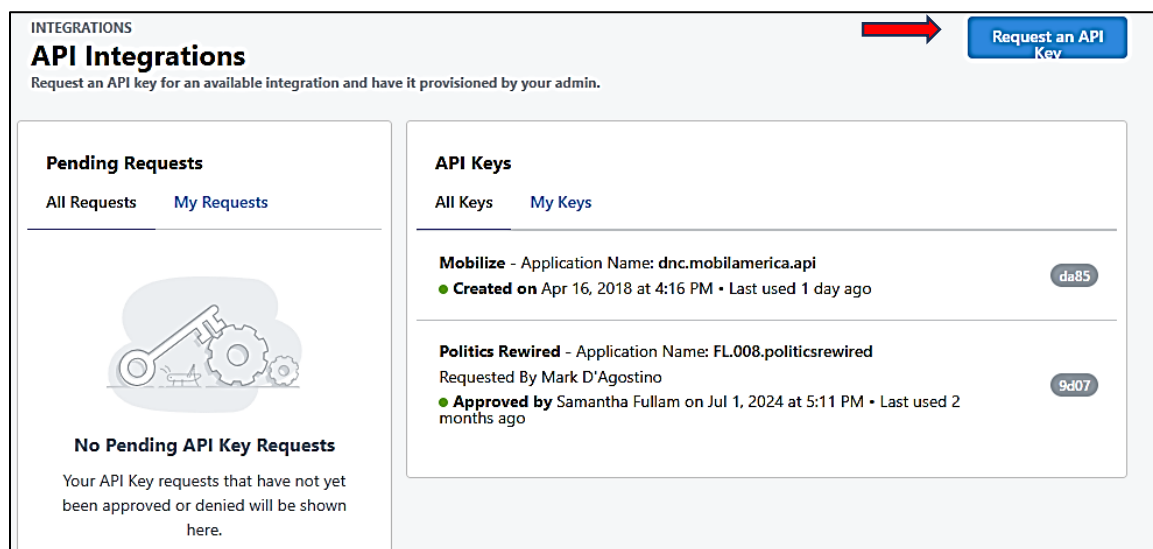

The screenshot shows the 'Your Organization' and 'Contact' sections of the 10DLC registration form. The 'Your Organization' section includes fields for Legal Organization Name, Organization Type, Doing Business As (DBA), EIN, Street, City, State, and Postal Code. The 'Contact' section includes fields for Organization Contact Name, Organization Contact Email Address, Organization Contact Phone Number, and a checkbox for 'Is the organization contact the person Scale to Win should reach out to with questions about this registration?'. The form is part of the STW Text interface, with a sidebar menu on the left and a 'Support' link at the bottom left.

- STW provides step by step [10DLC registration instructions](#) to register for a new 10DLC account and has a support team to assist.
 - Note for political 527 organizations (DECs): the registration requires your EIN and the IRS url to search for your 527 filings. Go to the [IRS forms site](#) and use the official name of your Executive Committee, Club, or Caucus to search.
- When done, request phone numbers with your local area code. These will show as the number the text is generated from.

Set up API Integration with Votebuilder (VAN) – recommended but optional

The NGP VAN/Votebuilder integration enables you to upload VAN lists directly into STW Text campaigns and sync your data back based on a contact's VAN ID. It's an easy one-time process.

- To Request an API Key: on the Votebuilder (VAN) Main Menu page, under the Administrative Menu, click “Integrations,” and then click “API Integrations.” On the following page, click the blue “Request an API Key” button in the upper right corner.

- In the popup window, select Scale to Win from the “Integration” dropdown menu. Then select “Sam Fullam” as the contact that the request will be sent to. Submit Request.
- Your request should be approved within 24 hours. When the administrator approves your request, you’ll receive an email notification to generate your API key in Votebuilder. The two pieces of information created when you generate the API key are Application Name and API Key. Copy and save on your computer where you can easily locate them as *they can only be viewed once*. (You can submit another request if you “loose” the key.)
- Open Scale to Win and click “Integrations”, then “Add New Integration”. Select NPG VAN/ EveryAction and copy and paste the saved Application Name and API key you just saved into the appropriate boxes. Check that the new Integration shows on the Integration list in VAN.

Link Folder(s) in VAN to Scale to Win

To upload lists directly from VAN, lists must be saved in a folder shared with Scale to Win.

- Go to My Folders on the VAN homepage.
- Add a new “Scale to Win” folder then check the box "Allow other users to save into this folder". Click SAVE. The next screen gives you the opportunity to drag “API User, Scale to Win” into the "User Access" section. SAVE.
- Note: You can share multiple folders with the API User so you may want to label folders more specifically, e.g. Scale to Win Special Election ‘25.
- SAVE your texting lists in the new folder you've made accessible to the Scale to Win.

Prepare for the Texting Campaign

As with all campaigns, the first step is to decide which voters you want to reach, your objective, your message, what “ask” you might include (e.g., click the SOE link to re-enroll in Vote by Mail), and the amount of your budget.

- **Create your list in VoteBuilder (VAN).**
 - The list must include at least first name, last name and a phone number.
 - It is recommended to include phone type field (home or cell) plus the “Is a Cell” field (include verified, likely, or likely not a cell since some “likely not a cell” phones are cells).
 - STW will run the list through an Authenticator and remove invalid numbers in advance of texting and show you the number of invalid numbers.
 - Label your list for clear identification and SAVE in the VAN Scale to Win folder.
 - On the summary page, note the number of voters and phone numbers to estimate your cost and determine how many segments you can afford.
 - See instructions for processing your VAN list using Enhanced Message System (EMS) if you want to create and add a short link to track the voters that click your link (like to the Supervisor of Elections) and to save you characters in your text segment.
- **Create your message as a separate document to get team feedback and edit. Decide on tags and response scripts. SAVE to have readily available to copy and paste into STW.**
 - Count each letter, space, and punctuation as a “character” for the segment length (160 characters for first segment, 153/segment for 2 or 3 segments). STW counts as well when you enter your message into STW. [STW Segment/Character Estimator](#)
 - \$.0115 per contact per segment \$.0325 per contact for 3+ segments or MMS
 - Text must identify the sender (e.g., Lee Dems) and include a “STOP to End” or “STOP to Opt-Out” statement. STW will remind you. Check with your organization whether you need to include a “paid for by” statement.

Set up a Generic/Global Set of Tags and Response Scripts in Scale to Win

If this is your first texting campaign you need to set up a list of generic/global tags and scripts. These are tags and response scripts that you would use in almost all campaigns. You can add campaign-specific ones or modify these generic ones at any time. You can add these while waiting for your 10DLC token since this is the most time-consuming step.

After you log in to Scale to Win, you will see a Menu on the left-hand margin. Selecting Tags and Response Scripts will take you to the pages to enter your “library” of tags and response scripts.

Tags (See Appendix 1 for commonly used tags.)

Tags link the responses from your texting campaign back into VAN either as part of a response script or as a stand-alone tag. It is important to agree as a DEC team how you want to tag things in VAN. Most DEC's will use Canvass Results and Activist Codes as their tags. Once back in VAN, tags can be used in a search to include or exclude specific voters in future campaigns.

- Enter a global set of the tags that correspond to anticipated responses for most campaigns. This can be done prior to initiating your first campaign while you wait for your 10DLC approval or as you add campaigns.
- For the Global set of Tags, in the left-hand Menu, click Tags, +New Tag, and enter the tags for your current campaign or the global list you have used for previous campaigns. Modify later as needed.
- Example Tags used by many DEC's (see Appendix 1 for a more complete list)

Activist Codes:

Activist: FDP opted Out; SMS opted-in

Visibility: VBM thru 2026

Visibility: Voting or Lean Rep

Canvass Results

moved; wrong number; deceased; hostile; Spanish; other language

Tag Name	Integration	Tag Action	Actions
not supporting dems/trump/MAGA	VAn STW API > MyVoters	Activist Code: voting or lean R	
other language	VAn STW API > MyVoters	Canvass Response: Other Language	
spanish	VAn STW API > MyVoters	Canvass Response: Spanish	

- If you have set up API integration with VAN you can have your tags to automatically go back into VAN. Click the “pencil” icon to the far right of each tag. In this example, the

Volunteer will be integrated in VAN as an Activist Code. The Activist Code must already be in VAN so you can select it. Canvass Results options are all in VAN already and cannot be modified. Tags can be integrated with VAN as an Activist Code, Canvass Result or Survey Question answer.

Edit Tag

Response Scripts (see sample generic response scripts in Appendix 1)

- Texting volunteers need scripts available to provide uniform responses to those who respond to the initial text message. Response scripts can be linked to a tag that will attach to a voter's record in VAN (e.g., a hostile response can be tagged as a "hostile" canvass result).
- For each campaign you will import the scripts that most closely match the current campaign and edit if needed for the current campaign.
- You can load a "library" of commonly used responses in the "Response Scripts" section as one group or organize in sub-groups groups such as Generic, VBM, GOTV, etc.
- Scripted responses should be linked to a TAG (e.g., moved, deceased, etc.) that will sync back to VAN as an Activist Code, Canvass Result Status, or Survey Question answer if you have activated the API Integration.
- To ADD a response script, click Response Scripts in the left-hand Menu. First add a Group (e.g. Generic or Global, or VBM, or GOTV, or Volunteer)

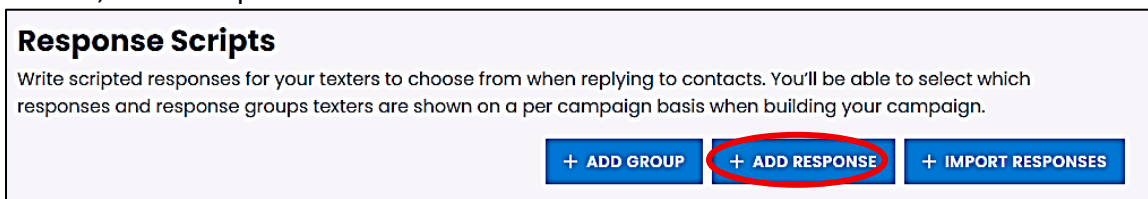

Response Scripts

Write scripted responses for your texters to choose from when replying to contacts. You'll be able to select which responses and response groups texters are shown on a per campaign basis when building your campaign.

+ ADD GROUP + ADD RESPONSE + IMPORT RESPONSES

Second, add a Response.

Response Scripts

Write scripted responses for your texters to choose from when replying to contacts. You'll be able to select which responses and response groups texters are shown on a per campaign basis when building your campaign.

+ ADD GROUP + ADD RESPONSE + IMPORT RESPONSES

Add the Title. Copy and paste the script from Appendix 1 or write your own. Use the drop-down list to select one or more auto-tags. Select one or more groups for easy selection when setting up a campaign.

Set up the Texting Campaign in Scale to Win

After you login to Scale to Win, you will be in the backend and in the left-hand column you will see a menu with pages for building campaigns, managing people, adding optouts, and more.

To set up a new campaign, from "Campaigns", select "+ New Campaign" and follow down the list of options in order. (If running a similar campaign for a different list you can copy a previous campaign, rename and edit it, and load a new list.)

7

Basics

- Add the Title of your Campaign and any description desired
- Integration section is only visible if you have set up the API Integration in VAN
Click the correct NPG VAN Instance (My Voters or My Campaign) to pull a list from and return data to VAN using API
- Texter Settings should be the defaults. You can set those in Settings or modify here but usually the defaults are fine.

Sending Numbers

- STW lists your default 10DLC numbers – select one – or STW will select one
- If your 10DLC registration has not processed yet, request Quick Start from STW Load Contacts

Load Contacts

- Select CSV Upload for user created files (this includes lists processed through EMS)
- Select API NGPVAN/Every Action to upload a list directly from VAN. STW has a drop-down menu of all the lists in the VAN STW API folder – select the one you want.
- Upload the list and check it has the correct information.
- Directly below your list,
 - select the column header from the drop-down menu that contains the phone number you want to text.
 - Select the correct column header that includes the VANID (e.g., external-id)
 - Click CONTINUE
- At this point STW removes contacts with land lines, have opted out or have bad numbers and tells you how many contacts that is in the List Summary.

List Summary

1400 contacts loaded from Sanibel_Muni_Contacts_Voters.csv

7 contacts skipped due to invalid phone numbers
41 opted-out contacts skipped
36 landline numbers skipped

[Download Invalid Numbers](#)

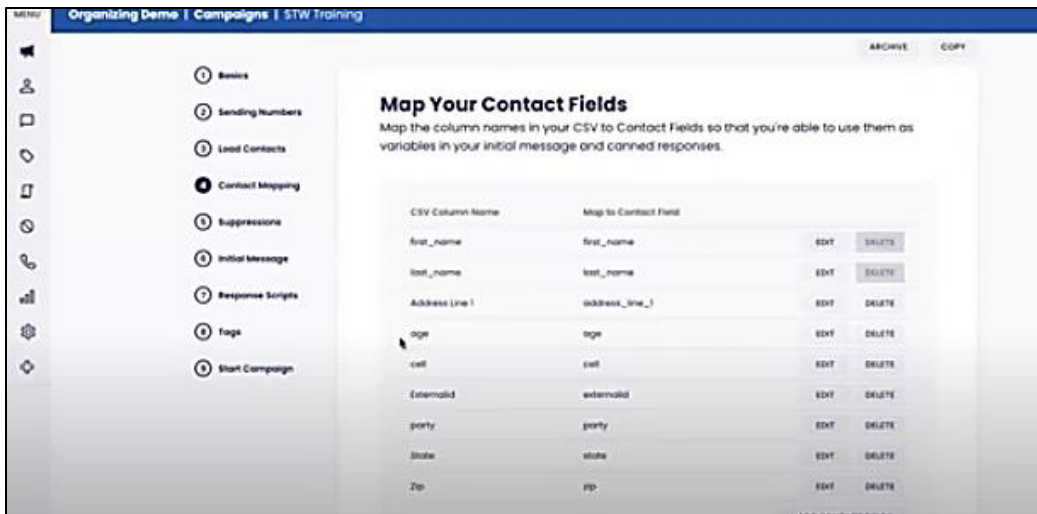

1,316 total contacts in campaign **DOWNLOAD LIST**

List Preview ▼

CONTINUE

Map your Contact Fields

- STW automatically maps the csv column names with the contact fields you can use in your message. Check that any csv contact field you are using in your message is mapped correctly to the contact field – edit if needed.

Suppressions

- Allows you to identify and remove overlaps between campaigns. In general, you can skip this step.

Initial Message

- Copy and paste from the planning document saved on your computer and click on the contact field to add, for example, `{{first_name}}` or `{ems_link1}`. You may add a new contact field if it is also a column header on your list.

Variant 1

Initial Message Text - 578 Total Characters / 1222 Characters Left in Message (≥ 3 segments billed as MMS)

Hi `{{first_name}}`, Lee Dems here. Sanibel's Municipal Election is on March 4. The Progressive Club of the Islands has endorsed Laura Jane DeBruce, Mike Miller and Lyman "Chip" Welch. If you have a mail ballot, please cast your vote and return it now. Voting by mail makes it easy to vote and there's still time to get your ballot - click `{{ems_link1}}` to sign up, or call Lee Elections at 239-533-8683 M-F 8:30 to 5. The USPS does not forward ballots, so be sure to include the mailing address where you will be when they're mailed to ensure that you receive yours. Stop to end

+ NEW CONTACT FIELD

UPLOAD MEDIA FILE

Upload a picture, video or GIF. Files must be jpg, png, gif, or mp4 format and under 500 KB.

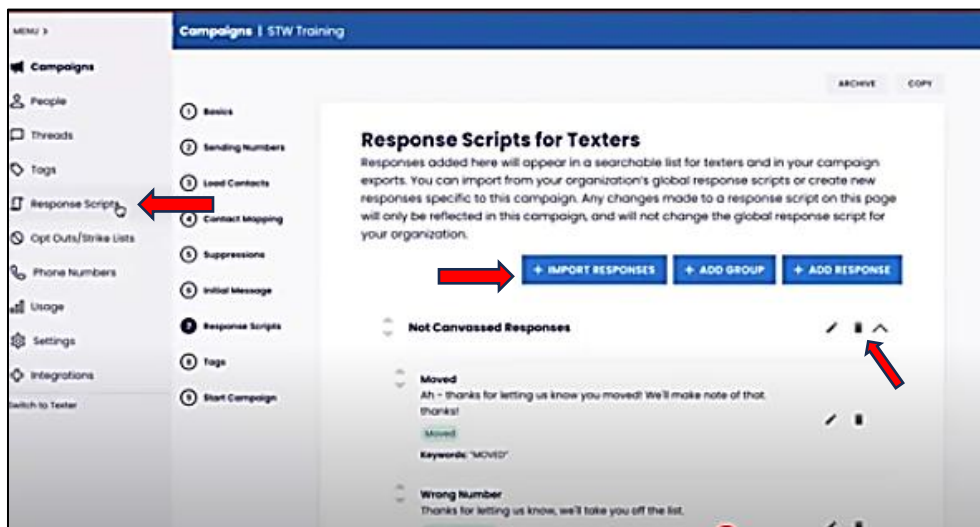

☐ Override default link settings (link shortening disabled)

- STW will stop you if you do not have an acceptable OptOut statement or sender identification.
- Check the character and segment counter in the upper right above your typed message.

- To include an image, click “Upload Media File” below the typed message. Including an image requires an MMS text (\$.0325) even if the message is only 160 characters. Take advantage of the fact that MMS allows for up to 1600 characters.
- *Note that using ANY foreign language characters or symbols like a tilde accent ~ automatically changes your text to MMS even if only 160 characters.*
- Click Message Preview to see how the final message will look with a random name from your list name embedded in first_name.

Response Scripts

- IMPORT the response script GROUP (e.g., Generic/(Global + VBM) or the individual response scripts you want for this campaign. You can also add responses for this campaign the same way you did during set-up.

Tags

- Most of your tags will be “auto-tags” that automatically go back into VoteBuilder (VAN) when a response script is selected.
- STW allows you to select other tags that your texting volunteers might want to select from in case they need an additional tag for a particular response. For instance, most wrong numbers are not hostile but one wrong number response might require that extra “hostile” tag.

Start Campaign

STW Text automatically takes you next to the “Start this Campaign” page. **Clicking Start Campaign does not automatically send out your messages.** It sends you to the final Campaign page with several options to review the text before sending.

NOTE that once the Start the Campaign button is clicked you will NOT be able to replace the contact file or change the sending number but edits can still be made to scripts, etc.

- Below the texter information there is a sample of the outgoing message. Double-check any links or phone numbers. This text has NOT been sent. Click the edit button at the top of the screen to get back into the campaign and make changes as needed.

- Click on the Preview button to send test messages to a few phones to review the “look” of the message or to send to stakeholders for final approval. It is useful to send to a few people with different devices (Android and Apple). Preview Phone Numbers can be set up on the preview pop up now or set up earlier when configuring system settings. The preview allows confirmation that all links and phone numbers are “live”. The preview text will come from the selected sending number and will have the name of the random person in the script variant. Again, if there is an issue with the display on a phone, go back into edit and correct it. Previews can be sent multiple times.

The screenshot shows a web interface for managing a campaign titled "STW Training". At the top, there are tabs for "EDIT", "ARCHIVE", "COPY", and "EXPORT DATA". The main heading is "STW Training is Ready to Send!". Below this, there's a section for campaign details:

- Started On:** October 7, 2024 at 9:37 AM EDT
- Send Status:** Not started
- List:** CSV upload from demo-shared-Senate and Space Training List (5,000) 4 Contacts
- Campaign Progress:** 0% - 0 of 4 contacts sent. A note says "Some contacts may be rejected."
- Phone Number:** (843) 333-8937
- Sending Hours:** 8AM - 5PM EDT

 To the right of these details is a summary box with three columns:

- 0.0% Reply Rate**
- 0.0% Filter Rate**
- 0.0% Opt Out Rate**
- \$0 Total Billed**
- 0.0% Estimated Cost**
- 0.0% Click Rate**

 Below the details is a section with three buttons: "PREVIEW TEXT" (highlighted with a red arrow), "SEND", and "SCHEDULE". At the bottom, there's a "Texter Information" section:

- Repiles:** 0 contacts need a reply. A link "View Threads" is next to it.
- Texter Link:** A URL starting with "https://demo.app.academy.com/join/..."

- Finally- it's time to send! The Send button has a drop- down menu that allows you to choose all or part of the list.
 - Optional best practice: send just 2 text messages first and use the Threads function (on the main menu) to double check the responses to make sure all variable information is loaded correctly. Filter for the campaign on the top of the Threads screen and 2 contacts should pop up. Click on the response tab at the bottom of the screen to review all of the available responses; use Edit to fix as needed before sending the rest of the messages. These two texts have been sent.
- To send the rest of the text messages, click the Send all which sends all the list immediately; OR click Schedule if the text is to be sent at a different time.
- Hint: when sending Vote by Mail enrollment texts, you may want to send in smaller batches to prevent overload of SOE resources and voter frustration trying enroll. There is a function that allows to you do this in this final screen.
- Last task: copy the texter link and send it to the texters so they can answer respondents as needed. Clicking on the link will also add it to your list of campaigns.

The screenshot shows the 'STW Training is Ready to Send!' campaign page. It includes a sidebar with navigation options like 'EDIT', 'ARCHIVE', 'COPY', and 'EXPORT DATA'. The main content area displays campaign statistics: 'Started On' (October 3, 2024 at 9:37 AM EDT), 'Send Status' (Not started), 'List' (CSV upload from demo shared-leader and spouse training list (5,000) 4 Contacts), 'Campaign Progress' (0.0% - 0 of 4 contacts sent), 'Phone Number' ((843) 313-8937), and 'Texting Hours' (8AM - 8PM EDT). A summary box on the right shows '0.0%' for Reply Rate, Filter Rate, and Opt Out Rate, and '\$0' for Total Balance, Estimated Cost, and Click Rate. Below the statistics are buttons for 'PREVIEW TEXT', 'SEND', and 'SCHEDULE'. A 'Texter Information' section shows '0 contacts need to reply' and a 'View Threads' link. A red arrow points to a 'Texter Link' field containing a URL, labeled 'Link for Texters'.

- To set up your team of texters, click “People” on the Main Menu. Add administrators who will be creating campaigns and texters who will be sending canned response scripts to responders and tagging responses. Either click “Get Invite Link” and copy to send a personal invitation with that link to the texting team, or click Invite User and enter their email address and STW will send the invitation and link. You can send the invitation to multiple people using the Invite User form.

The screenshot shows the 'People' management page. The left sidebar contains a 'MENU' with options: Campaigns, People, Threads, Tags, Response Scripts, Personalized GIFs, Opt Outs/Strike Lists, Phone Numbers, Usage, Analytics, Settings, Integrations, and a 'Switch to Texter' button. The main content area is titled 'People' and includes a 'User Status' dropdown (Active), a 'Sort By' dropdown (Name, A-Z), and buttons for 'GET INVITE LINK' and '+ INVITE USER'. A search bar is labeled 'Search for a user...'. Below is a table with columns: Name, Email, Role, and Actions. The table lists two users: Cindy Skiles (cindy.skiles@gmail.com, Admin) and Dave Waks (davewaks2@gmail.com, Admin). Each user has edit and delete icons in the Actions column.

- Monitor your campaign from the Campaign page that lists stats and identifies any respondents still needing a reply. Monitor all responses using the “Threads” tab.

After the Campaign

For every campaign you start, you can export the data collected. Click “Export Data” found in the upper right corner of the Campaign page for that campaign. You will receive an email with a link to download the data as csv files.

The screenshot shows a campaign page for "Sanibel VBM/GOTV 2-14-25". The page has a blue header with the text "Lee DEC | Campaigns | Sanibel VBM/GOTV 2-14-25" and a blue circle with a white "S" in the top right corner. Below the header, there are four buttons: "EDIT", "ARCHIVE", "COPY", and "EXPORT DATA". A red arrow points to the "EXPORT DATA" button. The main content area has a title "Sanibel VBM/GOTV 2-14-25 is Finished Sending!". Below the title, there is a table with campaign details:

Started On	February 14, 2025 at 5:29 PM EST
Send Status	Finished on February 14, 2025 at 5:33 PM EST
List	CSV upload from Sanibel_Muni_Contacts_Voters.csv 1,316 Contacts
Campaign Progress	100.0% - 1,316 of 1,316 initials sent
Phone Number	(239) 374-1649
Texting Hours	8AM - 9PM EST

Below the table, there is a section titled "Texter Information" with a sub-section "Replies" showing "1 contact need a reply" and a link "View Threads". At the bottom, there is a "Texter Link" with a URL: <https://floridadems.app.scaletowin.com/j...>

On the right side of the page, there is a box with performance metrics:

2.6% Reply Rate	0.0% Filter Rate	1.5% Opt Out Rate
---------------------------	----------------------------	-----------------------------

Below the metrics, there is a link "More Results" with a dropdown arrow.

- SAVE on your computer and process the phone metadata through EMS Spoke Analysis to upload that information (e.g., landline or verified cell) back into VAN. This information is not transferred automatically as part of the API process.
- If you did not set up API, you can also sync the Tag data back into VAN using EMS Spoke Analysis. See instructions for EMS Spoke Analysis for Scale to Win Text.

Appendix 1 – Commonly Used Generic (aka Global) Tags and Response Scripts

GENERIC SCALE to WIN TAGS		
TAG NAME	INTEGRATION	TAG ACTION
Wrong Number	County – My Voters	Canvass Result: Wrong Number
Deceased	County – My Voters	Canvass Result: Deceased
Hostile	County – My Voters	Canvass Result: Hostile

Volunteer	County – My Voters	Activist Code: Volunteer: Volunteer

Generic Group (aka Canned) Response Script Examples

WRONG NUMBER (AUTO-TAG *Wrong Number*)

Thanks for letting us know, we will remove this number from our records.

MOVED (AUTO-TAG *Moved*)

Sorry to bother you. Please let the Supervisor of Elections in your previous county know.

DECEASED (AUTO-TAG *Deceased*)

I am so sorry for your loss. We will remove this name from our list.

NOT SUPPORTING DEMS/TRUMP/GOP/MAGA (AUTO-TAG *Voting or Lean Rep*)

Have a good day. (or no response)

HOSTILE/VULGAR/ABUSIVE (AUTO-TAG *Hostile*)

No response needed.

SPANISH (AUTO-TAG *Spanish*)

CREOLE (AUTO-TAG *Creole*)

OTHER LANGUAGE (AUTO-TAG *Other Language*)

(optional) POTENTIAL WRONG NUMBER/VERIFY VOTER

Just to confirm that we have a correct number, is this {firstName} {lastName}?

(optional) CONFIRMED VOTER IDENTITY (AUTO-TAG *Confirmed ID*)

Thank you.

Volunteer Group

HOW CAN I VOLUNTEER? - Generic response (AUTO-TAG *Volunteer*)

Please go to www.leecountydems.org/get-involved-2/ and sign up!

I AM NOT IN FLORIDA NOW, OTHERWISE I WOULD LOVE TO VOLUNTEER (AUTO-TAG *Volunteer*)

There are many volunteer activities that can be done from anywhere - joining a phone bank and writing postcards are just two. Please go to www.XXcountydems.org/get-involved-2/ and sign up!

OFF TOPIC

Thank you for your response. Have a good day.

I HAVE REPEATEDLY ASKED YOU TO DELETE ME FROM YOUR TEXTING LISTS (automatic STW OPT OUT)

We will opt this number out from receiving texts from the CC County Democratic Party. Several organizations with whom we are not connected, including national and state groups, are also texting voters. We cannot delete you from their lists.

WHO ARE YOU? / WHY ARE YOU TEXTING ME? / WHERE DID YOU GET MY NUMBER?

We are volunteers from XX County (FL) Democrats. Your info was provided by the XX County Supervisor of Elections identifying {firstName} {lastName} as a registered voter. If this information is not correct, please go to <https://lee.electionsfl.org/Admin/Check-my-Registration-Status> to correct it.

What is "XX DEC"?

XX DEC is the Democratic Party of XX County, Florida.

VBM BALLOT RETURN GROUP

You can turn your Mail in Ballot at the Supervisor of Elections Office M-F from 8:30 am to 4:30 pm or on April 1st from 7 am- 7pm. You can also drop it off at either the XX County Library or the Supervisor of Elections during Early Voting (March 22-29 10 am-6 pm)

Already Signed Up for VBM

Just to be sure, go to <https://www.XXcountyelections.com/my-voter-info> to check the status of your request

Yes- will sign up

Thanks! Make sure you do it not later than _____ (edit for each campaign)

No- any reason

Please reconsider! Vote by mail is safe and easy! You can still vote at the polls if you choose. And receiving a mail in ballot can be a good reminder about the election.

NO- firmly stated

Thank you for your time

Can I sign up by phone?

Yes! Call the Supervisor of Elections at xxx-xxx-xxxx. They are available M_F from 8:30 am to 4:30 pm

Dem Office Information

You can contact the Flagler Dems by phone at 386-283-4883 or stop by the office. We are located in the City Marketplace 160 Cypress Point Pkwy, Palm Coast Suite #C214 above the Cue Note Billiard Room. Office hours are variable so call ahead to make sure we are open.

I'm Driving

When you get a chance. please sign up to Vote by Mail at <https://www.XXCountyelections.com/Request-a-Mail-Ballot>

I don't believe in Vote by Mail

Requesting a Vote by Mail ballot is great insurance that if anything comes up, your voice will be heard. You can still vote at the polls but you will have the entire ballot to review in advance with Vote by Mail.

You can go to <https://www.flaglerelections.gov/Election-Info/2025-Special-Electionsfor> for information on when and where you can vote in person.

Voting in person

Great! Early voting is March 22-29 10 am- 6 pm at two locations: Flagler County Library and the Supervisor of Elections Office. On election day, April 1, you must vote in your precinct. Locations may be different than normal, so check out where to go at <https://www.flaglerelections.com/For-Voters/Find-Your-Precinct> before you head out on the 1st.

VBM CHASE GROUP

Done!

Terrific! In a few days, go to <https://www.XXcountyelections.com/my-voter-info> to make sure your ballot was received and counted.

VBM ballot return

You can turn your Mail in Ballot at the Supervisor of Elections Office M-F from 8:30 am to 4:30 pm or on April 1st from 7 am- 7pm. You can also drop it off at either the XXX County Library or the Supervisor of Elections during Early Voting (DATES and TIMES)

Voting in person

Great! Early voting is {DATES} {TIMES} at two locations: XX County Library and the Supervisor of Elections Office. On election day, April 1, you must vote in your precinct. Locations may be different than normal, so check out where to go at <https://www.XXCountyelections.com/For-Voters/Find-Your-Precinct> before you head out on the 1st.

Why XXX Candidate?

We believe he/she is the candidate who will best represent our district in the US Congress (edit for each campaign). You can find out more about Josh and his priorities at https://_____

Dem Office Information

You can contact the XX County Dems by phone at xxx-xxx-xxxx or stop by the office. We are located at _____. Office hours are variable so call ahead to make sure we are open.

Day of GOTV

Precinct is wrong.

Precincts are different for this election because schools aren't available for voting. You can confirm your precinct location at <https://www.XXCountyelections.gov/For-Voters/Find-Your-Precinct> or by calling the Supervisor of Elections at xxx-xxx-xxxx

Need a ride, help, etc.

Contact the XXCounty Democratic office at xxx-xxx-xxxx and someone there should be able to help you.

BoilerPlate

Returning Citizens

Returning citizens can contact the Florida Rights Restoration at Coalition.info@floridarrc.org or 407-901-3749. This grassroots organization is assisting in getting former inmates eligible and registered to vote.

Thank you

You are welcome- and thanks for being a voter!
